

ADDENDUM NO. 1

December 17, 2007

TO: **All Potential Bidders**

SUBJECT: BID NO.: 8578-0/23

TITLE: Development of Landfill Gas Utilization Systems (LFGUS) at North Dade and South Dade Landfills

BID OPENING DATE: **Wednesday, January 30, 2008**

This Addendum is and does become a part of the above mentioned bid.

The following clarification is provided regarding the diversion of landfill gas to the waste water treatment plant at the Miami-Dade County Water and Sewer Department (WASD):

The LFG that is to be diverted to the WASD wastewater treatment plant will be used as additional fuel for WASD's existing gas to electric generators. WASD produces power from burning its digester gas to offset the need to purchase electric power to operate the POTW.

WASD's existing generators have some excess capacity. The LFG fuel will be used to maximize the existing generators' utilization. WASD may also add generating capacity to produce more power for its in-house uses using LFG.

A handwritten signature in black ink, appearing to read "Km! Ra", written over the typed name.
